EXPERIENCE

Frontend Developer, Jalisoft

Jan 2020

In Jalisoft i have worked on many projects, some of them for a university using technologies such as React for building a frontend with a very smooth look and feel, Redux for maintaining state along the whole application and Styled Components to enrich the styling files with the necessary business logic of the app and making it more dynamic.

Personal Projects

Mar 2018

I have been working on personal projects to strengthen my coding skills in areas like Frontend, Backend, Databases, Mobile Apps and Software Architecture as well since i am a Full Stack Developer. I have worked with technologies such as React.js for the Frontend; Golang and Node.js for the Backend; React Native for Mobile Apps development; MongoDB and MySQL for the Databases.

EDUCATION

Self Taught

Jan 2018

I started my path as a Self-Taught Software Developer in early 2018 by taking many online courses, reading the documentation of the languages and technologies i wanted to learn, reading blogs of technology, watching youtube tutorials and most important, building my own personal projects.
